Door Handing Chart

Stand on the outside, the key side, and face the door. Hinge side gives L or R; a door that swings toward you adds the R for reverse.

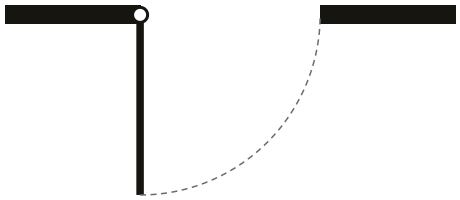

Outside: you stand here, key side

LH left hand, DIN rechts

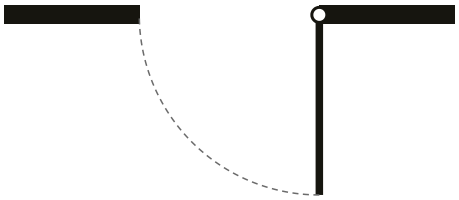

Outside: you stand here, key side

RH right hand, DIN links

Outside: you stand here, key side

LHR left hand reverse, DIN links

Outside: you stand here, key side

RHR right hand reverse, DIN rechts

Term	Hinges, seen from outside	Swing, seen from outside	Latch bevel faces	DIN equivalent
LH, left hand	Left	Away from you (inward)	Outside	DIN rechts
RH, right hand	Right	Away from you (inward)	Outside	DIN links
LHR, left hand reverse	Left	Toward you (outward)	Inside	DIN links
RHR, right hand reverse	Right	Toward you (outward)	Inside	DIN rechts

Write this on the order line

Letters and convention

Door number or location

And the door in words: the side you stood on, which edge the hinges are on, and whether the door came toward you. DIN reads from the side the door opens toward, so a plain "left" is not enough on an international order.
