DSL02

Door Coordinator

Hardware Accessories

Specifications

Material	Stainless Steel 304
Installation	Surface Mounted
Application	Fire Doors / Commercial Double Doors / Schools / Hospitals / Office Buildings / Commercial Projects
Function	Automatic Door Sequencing
Feature	Adjustable Closing Force
Roller Material	Nylon

Features

– This double-door coordinator is designed for fire-door and commercial double-door systems.

– Made from durable 304 stainless steel, it provides smooth, stable, and quiet automatic door sequencing.

– The precision spring mechanism and adjustable tension screw allow flexible control of the closing force, while the nylon roller design ensures reduced wear and long service life.

– Ideal for commercial buildings, hospitals, schools, and other high-traffic applications. OEM and ODM customization services are available.

Confirm on order

Not stated in our published data, so confirm on the order: finish codes, fixing-hole positions, overall dimensions, order code per finish.
